PROFESSIONAL SUMMARY

I am a passionate student of Computer and Communication Engineering with expertise in Java, Python, web technologies, SQL, and foundational SAP. Through internships, I have built efficient, scalable, and user-friendly applications. Proficient in Git and familiar with agile practices, I thrive in collaborative environments and am eager to leverage technology to solve problems and deliver impactful solutions.

EDUCATION

Bachelor of Engineering – Computer and Communication Engineering 2023 – 2027 (Expected)
VSB Engineering College, Karur, Tamil Nadu | Current CGPA: 8.5

Higher Secondary Certificate (Higher Secondary) Completed 2023
Sri Vinayaga Matric Higher Secondary School, Namakkal, Tamil Nadu | 86.17%

TECHNICAL SKILLS

Programming Languages: Java (Core & Advanced), Python, Basic C
Web Technologies & Frameworks: HTML, CSS, JavaScript, Spring Boot
Database: Microsoft SQL Server, MySQL
Tools & Platforms: Git, Eclipse, IntelliJ IDEA, VS Code, PyCharm
AI Tools: TensorFlow Jupyter Notebook, Google Colab Flask

INTERNSHIP EXPERIENCE

Software Development Intern – Infosys November 2025-February 2026
Project: Automation Test Framework | Enterprise Java & Test Automation

- Designed and developed a modular Automation Test Framework from scratch using Java, enabling reusable and scalable test execution across multiple modules

Full Stack Developer Intern – NXT Logic Software Solution December 2024 – January 2025
Coimbatore, Tamil Nadu | Full Stack Web Development

- Built and deployed responsive web applications using HTML5, CSS3, JavaScript, and PHP

Data Science Intern – Coincent June 2024 – July 2024
Bangalore (Remote) | Python, Data Analysis, Machine Learning

- Built, trained, and evaluated classification models using Scikit-learn optimized hyperparameters to improve model accuracy
- Documented findings and model performance metrics in structured reports for internal review

PROJECTS

SkillBarter – Peer-to-Peer Skill Exchange Platform [\[GITHUB\]](#) React | Flask | MongoDB | Socket.IO | JWT

- Engineered a full-stack web application enabling users to list, discover, and exchange skills.
- Built JWT-based authentication with Flask-JWT-Extended

AI-Based Fake News and Misinformation Detection System [\[GITHUB\]](#) React | Flask | Scikit-learn | NLTK | SQLite

- Built a machine learning web application to classify news articles as real or fake using NLP
- Applied TF-IDF vectorization and NLTK text preprocessing (tokenization, stop word removal, stemming)

Doctor Appointment Booking System [\[GITHUB\]](#) MongoDB | Express | React | Node.js | JWT

- Developed a full-stack MERN web application enabling patients to search, select, and book doctor appointments online
- Implemented JWT-based role authentication for patients, doctors, and administrators

BankBot AI – Banking Chatbot [\[GITHUB\]](#) Python | Flask | NLP | SQLite/MySQL | HTML | CSS | JavaScript

- Developed an **AI-powered banking chatbot** to automate customer queries like balance check, transactions, and FAQs
- Built backend APIs using **Flask** and integrated with a **database** for secure data handling

CERTIFICATIONS&ACHIEVEMENTS

- Google & Kaggle – AI Agents Course (Dec 2025)
- SAP S/4HANA – Sourcing & Procurement
- Salesforce Administrator Explorer
- NPTEL – Programming in Java (Silver Medal)
- NPTEL – Data Science (2024)
- Guvi – Java Certification
- Infosys – GenAI for IT, Java Foundation Certification
- IEEE ICSCN 2025 – 6G Spectrum Mgmt. (Paper ID: 1061) Federated Learning Research (Paper ID: 321)
