---

An enthusiastic and self-motivated Computer and Communication Engineering student with a strong interest in Machine Learning, Deep Learning, Artificial Intelligence, and IoT. Seeking a technical role that enables effective application of skills, continuous learning, and meaningful contribution to the organization.

---

## Education

V.S.B Engineering College  
Computer and Communication  
Engineering

Current CGPA: 8.9/10

Sri Aanoor Vidhyalaya matric  
higher sec school(XII)-2023  
Score:81%

## Skills

- Languages: Python,Java,SQL
- Frameworks: Django, Flask, Spring Boot
- Teamwork,
- Problem-solving, adaptability,
- Time management

## Hobbies

- Exploring emerging technologies and digital tools
- Engaging in knowledge-based quiz and strategy game shows
- Playing cricket to build teamwork and discipline

## Achievement

- Paper accepted at ICSCN 2025 Conference (Paper ID: ICSCN-426)
- Paper accepted at ICSCN 2025 – Acceptance (Paper ID:ICSCN-324)

## Internship

Retech Solution  
Full Stack Development

- Completed hands-on internship in Full Stack Web Development
- Developed responsive web applications using HTML, CSS, JavaScript

Nxtlogic Solution  
Cloud Computing

- Gained practical knowledge of Cloud Computing concepts and services
- Worked with cloud platforms for deploying and managing applications

## Certification

- Certification in Programming in Java (NPTEL) won Elite
- Certification in Python and Java Programming through Coursera
- Paper accepted at ICSCN 2025 Conference (Paper ID: ICSCN-426)
- Internship Certification in Infosys Springboard
- Certification in Salesforce Administrator(Nasscom)
- Certification in alesforce Becoming an Agentforce Champion(Nasscom)

## Project

- FarmChainX – AI-Driven Agricultural Traceability Network  
Built an AI-driven agricultural traceability system to improve supply-chain transparency and data reliability.
- A Transformer-Enhanced Graph Neural Network Framework for Lightweight Real-Time Intrusion Detection in IoT Networks  
Built an AI-based real-time intrusion detection system for IoT networks with a focus on lightweight performance
